InfiniMite VARIABLE MAGNIFICATION LENSES

Dynamic Focusing

The Dynamic (Internal) Focusing System (DFS) in the InfiniMite *automatically* sets the best image for you. As you focus, the DFS does all the "figuring" for you. At *any* working distance—at *any* magnification. They're about as *compact* as can be. They never change their length. All can be motorized.

Our DFS lenses may cost a bit more. But—besides better imagery—how much is your *time* worth? Not to mention getting your job done quicker and easier. Compare them with any other manufacturer's offerings. *They are different.*

There's an InfiniMite that solves your vision problem listed below. Call us for special requirements.

The difference between the Alpha and Beta models is that the Beta produces the same magnification as the Alpha, but with approximately 50% greater working distance at any given time. Likewise, the difference between the Beta and Gamma models is that, with the exception of its starting magnification, the Gamma produces the same magnification as the Beta, but with approximately 50% greater working distance at any given time. Consequently, the three models represent steps in a progression of "smart magnifications". Please refer to the magnification charts for specific details.

InfiniMite Lenses

252120	InfiniMite Alpha	\$ 1,030.00
252122	InfiniMite Beta	1,095.00
252124	InfiniMite Gamma	1,150.00

Amplifiers

690568	DL Tube/2x Power Module Amplifier	\$ 255.00
220568	LDL 2x Lockable Power Module Amplifier	360.00

Accessories and Adapters

990170	Small Mounting Clamp (optional)	\$ 110.00
211106	66mm Fiber Optic Ring Light Adapter	255.00
